ADVANCE LISTING OF 1957 INTRODUCTIONS

As usual we will co-introduce several of the new creations of the glad world, and, along with these we will offer for the first time three new Dutch varieties that are creating quite a stir amongst growers.

Listed here are but a few of the early releases. A full and more complete description will appear in our Spring Catalog which will be out the fore part of January.

OUR OWN INTRODUCTION

DONNA M. (432) (Hecht '57) (M)

(Arthusia x Spic & Span). A clean, ruffled salmon with a slight blending of yellow in the throat. Fine substance. Field height 48 inches, 17 to 19 buds with 6 open, 5 in color, flower head of 20 inches average. Has excellent opening qualities when cut in bud and with its useful color could become quite popular for the commercial grower.

Large or Medium Bulbs \$1.00 ea. or 6 for \$5.00

From The Waterloo Glad Club, Waterloo, Iowa

GEYER'S GLORY (462) (Lew Geyer, Traer, Iowa) (M)

It is everyones ambition to breed the "World Beater", Lew came close, particularly insofar as color is concerned for **Geyer's Glory** has few equals in perfection of color. It is a beautiful pinkish-lavender, finely ruffled and with excellent texture. Tall, with medium length flower head of 19 to 22 buds, 6 to 8 open. Wonderful propagator and excellent health.

Large or Medium Bulbs \$1.00 ea. or 6 for \$5.00

From LEONARD BUTT, Huttonville, Canada

Each year when it comes time to select seedlings for possible introduction, we soberly cogitate on the best way to introduce them to our customers and to other cataloguers who also list them. No one plan seems to be just right and in an endeavor to find a way in which more people can initially enjoy these grand new varieties we are reducing the price of bulbs and completely eliminating the sale of bulblets.

In this way we feel more people can afford some 1957 models at once and not have the frustration of waiting until they come down in price. We are particularly proud of our three large and five miniature offerings as we feel they will be welcome additions.

Now here is the big news on prices:

One Bulb (Size 1 - 2 or 3) for \$1.00

**Five Bulbs (Size 1 - 2 or 3) for \$4.50
of one variety**

**Ten Bulbs (Size 1 - 2 or 3) for \$8.00
of one variety**

**Special collection - one bulb (size 1 - 2 or 3) of
each one (8 different and distinct varieties) for
\$6.85.**

Orders will be filled in rotation. Send your order today—specify size of bulbs desired so you will be sure to get what you want.

GREEN THUMB (212) (Butt '56) (E) New queen of the yellow miniatures—buds are actually green, tho when open the color is a greenish yellow. Deeply ruffled of very heavy substance and capable of opening 7 to 10. For the show its a champion sure.

PELLETIER D'OISY (290—M) The favorite "green" glad. Color is chartreuse with an orange edge and orange stippling over the flower. Will attract plenty of attention and is wonderful for home arrangements. Limited stock.

L .40; M .30; S 2-.40; Blbts. 9-.25, 100-\$.200

L 2-.25; M 3-.25; S 5-.25; Blbts. pkg. .25

TOYTOWN (236—E) (Bo-Peep x Twinkles) From the first time this bloomed we referred to this as a super Twinkles. Similar in color it is a fine scarlet with an unmarked deep yellow throat.

Grows 34"-36", an ideal height for a miniature with straight spikes. 17-18 buds, 7-8 open, well placed and attached. Very heavily ruffled and leathery texture. Excellent propagator and grower. Silver medal award, Canadian Glad Growers Trial Grounds, 1953. The top seedling of the year with a score of 90.

L .75; M .50; S .25; Blbts. 4-.25, 100-\$4.00

THE ORCHID (260—E) Outstanding old timer of light lavender. Visitors at our field always fell in love with this beauty. It looks very much like a real orchid.

EARLY ORDER DISCOUNT

10% discount will be given on orders of \$3.00 or over mailed prior to January 1st, 1957. Or if you prefer we will put in extras over our usual extras we give with every order.

We urge you to order early, as in some cases our stock is small on some varieties and we may be sold out of those you really want.

LARGE FLOWERED

GOLDCREST (Spotlight x Belle Jaune) (412) (Early)

A brilliant deep golden yellow, absolutely unmarked. In addition to its intense pure color, good growth habits and deep green healthy foliage, **Goldcrest** is early and will help fill the need for this color early in the season. Plants average 45" to 47", straight spikes 22', 20 buds and eight open florets set in precise arrangement. Bulbs are excellent in appearance, keep well and increase is excellent.

MONOGRAM (Dauntless x Evangeline) (442) (Early Midseason)

This splendid rose-toned pink blends to a creamy throat and is a truly satisfying and useful color. It's just the color the florists want and the ruffling enhances its appeal. For exhibition purposes it will also be in demand because of its ability to build strong 50" spikes of 20 buds that open 8 to 10 florets on well balanced flower heads of 26", all excellently placed.

QUAKER LADY (Florence Nightingale x Blue Boy) (478)

(Midseason). Although classified as a deep violet, this is not a so-called "blue". Probably bluish lavender most nearly defines it with deeper more violet throat, edged yellow. A decidedly different color not found in any other glad.

Spikes average 48" to 50" with 22" flower heads. 22 buds are usual with 7 to 8 well placed florets open. An excellent exhibition variety and much in demand by florists who find this color adds freshness and appeal to their arrangements.

MINIATURE

ALQUETTE (Crinklette x Wedgwood) (262) (Early)

This grand ruffled miniature has an appeal all its own. First is its color—fresh rose lavender with a creamy yellow throat sulimely beautiful. Secondly its heavy tetured deeply ruffled florets. Thirdly, splendid straight spikes 40" to 42" in height, 22" flower heads, 18 buds, 8 well arranged florets open.

We confidently predict a splendid future for **Alquette** which has never failed to thrill us each year during its seedling trials. For arrangements—a knockout, and will secure its share of prizes at the shows.

AMBROSIA (Lily White x Alpine) (232) (Early)

A miniature that is really ruffled and with very heavy petal substance. Add to this sparkling color—fresh rose pink some apricot shading plus a creamy yellow throat and you have an unbeatable combination.

Physically it compares with any Miss America beauty. 45" in height, 20" flower heads, 18 buds, 6 to 7 open florets perfectly arranged. Perfect for exhibition use and will make experts out of beginners in arrangements.

CORVETTE (Red Button x Sdlg.) 136) (Early)

The introduction of this variety heralds a new era for all 100 size glads. For too long now we have been content to have 3 or 4 open florets with tiny spikes 10 to 12 buds. The entrance of **Corvette** into this smallest group outmodes all previous concepts of what this class should be.

In color this spanking new 1957 introduction sets a high note. Fine shade of medium scarlet with a darker throat giving it a rich appearance. Spikes are straight and about 42" to 44" in height. 20 to 21 buds is normal with 8 to 9 double rowed florets open. A big styled glad in miniature. Slightly ruffled.

GOLDEN ROSEBUD (Statuette x Sdlg.) (212) (Early)

To say this is deepest yellow with a hint of chartruese scarcely does this ravishingly beautiful ruffled miniature justice. It needs to be actually seen to appreciate its beauty.

Builds uniformly good spikes of 40" to 42" in height, always straight with 22" to 23" of flower head. 21 to 22 buds is normal and 8 perfectly placed florets open at once. Like its seed parent, **Statuette**, this is a great exhibition variety and will be heard from when stock is available in quantity.

Unbeatable in arrangements since its color permits wide latitude of other colors and accessories.

POLLYANNA (Statuette x Sdlg.) (216) (Early)

Statuette has given us so many fine seedlings and this is one of the best as it provides an exciting new color. Very attractive shade of apricot buff with a clear blending yellow throat, a warm color and a useful one.

Produces excellent spikes easily and continually so it's no struggle to find a good one for the show. 40" to 42" is usual with 22" to 24" flower heads and 20 to 21 buds with 8 perfectly placed florets open.

Pollyanna just exudes quality and quantity as most large bulbs produce 2 to 3 spikes.
